

Pool Robot Comfort Cleaner

Pool cleaning at the highest level.

Maytronics is worldwide one of the leading manufacturer of the automatic pool cleaning robots.

Through a successful synthesis of high-quality processing, an intelligent technology and a practical application and a new standards of the automatic pool cleaning were set.

Comfort Cleaner – cleaning-technique with diagnostic-system.

The use of the Comfort Cleaners out of the established Dolphin range means modern cleaning technology with diagnostic system for an excellent price / performance ratio.

This beautiful shaped cleaning robot cleans all areas of the pool, floor, walls and waterline. It is suitable for private swimming pools up to a maximum length of 12 meters.

The user-friendly Comfort Cleaner calculates automatically, for the dimensions of your pool, the effective cleaning cycle. The unique self-programming software makes the specific use possible where there is a need of scrub, sweep and vacuum, regardless of the shape of the pool. The dirt will be collected in a large and easy washable filter bag.

With a 16m³/h capacity pump, the Comfort Cleaner filters the water of the pool even there where the water flow is not optimal.

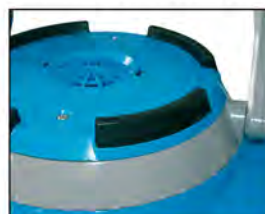

High user-affability through to the automatic calculation of the size of the pool for the most effective cleaning.

A self-programming software allows the recording of the entire pool area – including walls and water line – even if the shape of the pool is individual.

Well shaped and futuristic design with practice oriented solutions – as well as 3 changeable brush-rolls for different floor covering.

The advantages of the Comfort Cleaner robot:

- Interesting price / performance ratio on a high level of quality
- Especial developed software which calculates automatically the best possible way according to dimensions and shape of the pool
- Self-diagnostic system, controlled by microprocessors
- Large filter bag collects dirt, deposits and even dust particles
- Cleans, vacuums and filters without any problems the entire pool including walls and waterline
- Ecologic-friendly cleaning process and therefore less use of chemicals
- Equipped with a trolley (Caddy) for safe transportation, practical handling and storage (optional)
- With three different brushes available
- DIY (do-it-yourself) - easy maintenance
- 36 month warranty

Support "Made in Germany - by BEHNCKE.

In the Service Center in Putzbrunn are all components, from the motor unit up to the tiny consumable material, available. All relevant support data are memorized on a PC-base and true to a constant online connection to Maytronics we are always on the newest technical level.

Comfort and safety during transport and storage (including the "Power Supply") is included with the Caddy.

High quality manufacture and useful accessories (as the "Power Supply") guarantees trouble-free operation as well as a long-term function-period.

Comfort Cleaner - Specifications

Cycle time	- 3 hours
Cable length	- 17 m. (55ft.)
Weight	- 9 kg
Filter bag porosity	- Fine Micronic filtration 50 microns
Suction rate	- 16m ³ per hour, 5,084 Imp.Ga.
Motor unit voltage	- 24 VDC
Power supply	- Water-resistant IP54 230 VAC input power 28 VDC output energy
