

Pool - Robot Smart Cleaner

Pool cleaning at the highest level.

Maytronics is worldwide one of the leading manufacturer of the automatic pool cleaning robots. Through a successful synthesis of high-quality processing, an intelligent technology and a practical application and a new standards of the automatic pool cleaning were set.

Small, fast, inexpensive, powerful – the Smart Cleaner. With a modular self-diagnosis.

The entry model of the automated pool cleaning from the established Dolphin range depicts currently the standard of modern cleaning technology.

The talent of this small, inexpensive and easy to maintain robot are so unique that you no longer want to live without him.

The Smart Cleaner is specially suitable for private swimming pools up to a maximum length of 8 meters. Worth to mention is also the excellent cleaning- and brushing- activity of the robot, especially the cleaning of corners, as well as the filtration performance.

From now on you don't have to waste your free time with cleaning your pool.

Smart Cleaner - the robot with self-diagnostic cleans the whole floor very efficient within an amazing short period of time. To make this possible it needed the development of a innovative modular technology. With this technology you can reach also hard reachable areas.

Speed, smart technology, high quality and efficient cleaning are the famous features of the Smart Cleaners.

A new standard sets the high quality PVC brush which allows a fast cleaning cycles.

The advantages of the Smart Cleaner robot:

- Scrubs, vacuums and filters the pool in just 3 hours
- Particularly strong performance brushes
- Special filter bag collects dirt and deposits
- The large surface of the filter bag filters out even the finest dust from the water
- Autonomous unit - no pre installation needed, no connection to the pool systems necessary
- Self-programming for optimal pool scanning
- Small, lightweight and easy to handle
- DIY (do-it-yourself) - easy maintenance
- Equipped with PVC Brush
- Also available with filter cartridge
- 24 month warranty

Support made in Germany - by BEHNCKE.

In the Service Center in Putzbrunn are all components, from the motor unit up to the tiny consumable material, available. All relevant support data are memorized on a PC-base and true to a constant online connection to Maytronics we are always on the newest technical level.

Optional available is the filter cartridge which allows an easy-to-use maintenance.

It comes with a carrier which makes the transportation and storage easy and safe.

Smart Cleaner - Specifications

Cycle time	- 3 hours
Cable length	- 17 m. (55ft.)
Weight	- 8 kg
Filter bag porosity	- Fine Micronic filtration 70 microns
Suction rate	- 16m ³ per hour, 5,084 Imp.Ga.
Motor unit voltage	- 24 VDC
Power supply	- Water-resistant IP54 230 VAC input power 28 VDC output energy
